GENERAL INFORMATION

K.S.A. 79-32,234 provides a tax credit against the Kansas income tax liability of a taxpayer who makes a *qualified investment* in a *biomass-to-energy plant* for tax years beginning after December 31, 2005 and before January 1, 2011. The credit is 10% of the taxpayer's *qualified investment* on the first \$250,000,000 invested, and 5% of the taxpayer's *qualified investment* that exceeds \$250,000,000. The credit will be taken in ten (10) equal, annual installments, beginning with the year in which the taxpayer places into service the new biomass-to-energy plant or the expansion of an existing biomass-to-energy plant.

Before making a qualified investment, a taxpayer shall apply to the Secretary of Commerce to enter into an agreement for a tax credit. After receipt of application, the Secretary of Commerce may enter into an agreement with the applicant for a biomass-to-energy plant credit if it is determined that the taxpayer's proposed investment satisfies the requirements.

If the credit allowed exceeds the investor's tax liability in any one taxable year, the amount of the credit that exceeds the tax liability may be carried forward until the total amount of the credit is used, except that no such tax credit shall be carried over for deduction after the 14th taxable year after the taxable year in which the first annual installment is allowed.

Expenditures used to qualify for this credit shall not be used to qualify for any other type of Kansas income tax credit.

Biomass means any organic matter available on a renewable or recurring basis, including solid and liquid organic waste, but excluding: (1) Petroleum oil, natural gas, coal and lignite, and any products thereof; and (2) corn or grain sorghum suitable for human consumption.

Expansion of an existing biomass-to-energy plant means expansion which begins after December 31, 2005, of the capacity of an existing biomass-to-energy plant by at least 10% of such capacity.

New biomass-to-energy plant means a biomass-to-energy plant, construction of which begins after December 31, 2005.

Qualified investment means expenditures made in construction of a new biomass-to-energy plant or in expansion of the capacity of an existing biomass-to-energy plant, for real and tangible personal property incorporated in and used as part of such plant.
