## Instructions for Form MI-2210, Underpayment of Estimated Income Tax

### General Instructions

Use this form to determine if you owe penalty and interest for failing to make estimated payments or for underpaying the estimated tax due. You can be charged interest (and possibly penalty) if your payment was insufficient or late in any quarter. This is true even if you are due a refund when you file your tax return. The interest and penalty are figured separately for each due date; you could still owe interest and penalty even if you made up an earlier underpayment with an overpayment later. No penalty is charged if estimates were not required in the immediately preceding year; however, interest may still be due.

The estimated tax payments must be made timely, in four equal installments, and the sum of the installments must equal:

- 90 percent of the tax shown on your 2022 tax return, or
- 100 percent of the tax shown on your 2021 tax return, or
- 110 percent of the tax shown on your 2021 return if 2021 Adjusted Gross Income (AGI) was more than \$150,000 if filing joint or single (\$75,000 if your 2021 filing status is married filing separately).

Because this is a complicated form, you may choose to have Treasury compute your interest and penalty and send you a bill instead of completing the form yourself. If you want Treasury to figure your interest, complete your MI-1040 form as usual, leaving the interest line blank, and do not attach form MI-2210. Interest computed on this form and penalty charged for failing to file or underpaying estimates will be the same regardless of whether you pay with your return or if Treasury bills you.

#### You may avoid penalty and interest and should not file this form IF:

- You had no tax liability for 2021 (if you had to file), or you were not required to file a 2021 return and your 2021 federal tax return was for a full 12 months.
- The total tax on your 2022 return minus the amount you paid in withholding and all your credits is \$500 or less.
- You made timely estimated tax payments in equal installments that were at least 100% of your 2021 tax or 90% of your 2022 tax.

### Annualizing

If you receive income unevenly during the year (e.g., from a seasonal business, capital gain, severance pay or bonus) you may annualize your income.

Complete the MI-2210 form and the Annualized Income Worksheet (Worksheet) and include them with your Michigan annual tax return (individual or fiduciary).

### Special Rules for Farmers, Fishermen, and Seafarers

Do not file this form if BOTH of these apply:

- Your gross income from farming, fishing or seafaring is at least 2/3 of your annual gross income for 2021 or 2022, **AND**
- You filed your MI-1040 and paid the entire tax due by March 1, 2023.

### Where to Get Forms

If you need to file estimated tax, a 2023 Michigan estimated income tax formset (MI-1040ES for individuals, MI-1041ES for fiduciaries) is available at [www.michigan.gov/taxes](http://www.michigan.gov/taxes) or by calling 517-636-4486 to have tax forms mailed to you.

Visit [www.michigan.gov/iit](http://www.michigan.gov/iit) for information on how to make estimated payments using Treasury's e-Payments service.

### Line-by-Line Instructions

Before completing Part 1, add MI-1040, lines 25, 26, 27b, 28, 29 and 30. Subtract this sum from MI-1040, line 21. If the result is \$500 or less, do not complete this form. For MI-1041, subtract the sum of lines 18, 19 and 20 from line 17. If the result is \$500 or less, do not complete this form.

**FISCAL-YEAR FILERS:** Change due dates and interest rates to correspond with your tax year.

### Part 1: Estimated Tax Required for the Year

**Lines 2 and 3:** For individual income tax filers, enter the filer's name and full nine-digit Social Security number at the top of the form. For fiduciary filers, enter the name of the estate or trust and full Federal Employer Identification Number (FEIN).

**Line 4:** Figure your 2021 tax from your 2021 return. On the MI-1040 form, subtract the sum of lines 25, 26, 27b, and 28 from line 21. Enter that amount here or, if the AGI on your 2021 return is more than \$150,000 if filing joint or single (\$75,000 if married filing separately for 2021), enter 110% of that amount. Fiduciaries, enter the difference between lines 17 and 18 from your 2021 MI-1041.

**Line 5:** Figure your 2022 tax. On the MI-1040 form, subtract the total of lines 25, 26, 27b, 28 and 29 from line 21 and enter here. Fiduciaries, subtract the total of lines 18 and 19 from line 17.

**Line 9:** If you did not receive your income evenly throughout the year, you may annualize your income. See the instructions and the Worksheet on this form.

**Line 10:** Enter the estimated tax payments you made plus any withholding. Note the following:

- One-fourth of your total withholding is considered paid on each due date unless you can document the dates the tax was withheld.

- An overpayment from 2021 that has been credited forward to 2022 will be applied to the first installment.
- Do not enter extension payments on this form.

In column A, enter the estimated tax payments made by April 18, 2022, that were for the 2022 tax year. In column B, enter payments made after April 15 and through June 15, 2022. In column C, enter payments made after June 15 and through September 15, 2022. In column D, enter payments made after September 15, 2022, and through January 17, 2023. Extension payments or other payments received after January 17, 2023 are not considered estimated tax payments for tax year 2022.

## Part 2: Figuring the Interest

---

The MI-2210 computes interest to April 18, 2023, or the date of payment, whichever is earlier. This part of the form breaks down underpayments to the payment period they are due, then gives the interest rate for that period. Interest is figured for the number of days the installment remained unpaid. All payments are applied to any underpayment first, regardless of when the payment is received. The balance (if any) is applied to the next period.

**NOTE:** Complete lines 10 through 21 for column A before going to column B, etc. You need only complete each column to the date the payment was made. If the total underpayment for any payment period was not paid off with one payment, you may need to do several calculations in each column.

**Example:** Your tax due each period is \$2,000. You have an underpayment of \$1,000 for the first period (due April 18). On June 10 you send \$2,000 to pay the second installment. But, \$1,000 of this payment goes toward your \$1,000 underpayment first. Interest is computed on \$1,000 from April 18 to June 10 (53 days). The remaining \$1,000 is applied to your second installment payment, creating a second period underpayment of \$1,000.

Interest will continue to accrue on this \$1,000 until another payment is received.

**Interest rates** are set by Treasury twice each year for six-month periods starting January 1 and July 1. The rate is 1 percent above the prime rate in Michigan. For example, if the Michigan prime rate is 5 percent, your interest rate for completing the MI-2210 is 6 percent for that six-month period. For current interest rates, visit our website at [www.michigan.gov/taxes](http://www.michigan.gov/taxes) for a copy of *Revenue Administrative Bulletin 2022-15*.

---

## Part 3: Figuring the Penalty

---

Penalty is 25 percent of the tax due (minimum \$25 per quarter) for failing to file estimated payments or 10 percent (minimum \$10 per quarter) for failing to pay enough with your estimates or paying late.

**Line 23:** The underpayment for the penalty charge is figured the same way as the underpayment for interest.

Exceptions:

- Payments are applied in the quarter they are received.
- If an overpayment occurs in any quarter, the overpayment amount is carried forward to the next quarter and applied as a timely payment.
- Payments are not carried back to offset underpayments in previous quarters.

Subtract lines 10 and 11 from line 9 in each column. The amount on line 23 cannot be less than zero.

**Line 24:** Enter 25 percent if estimated tax payments were not made for 2022. Enter 10 percent if estimated tax payments were made for 2022.

**Example:** In the example in Part 2, the \$2,000 payment received on June 10 is applied to the \$2,000 required payment in the second quarter. The penalty in the first quarter is \$100 (10 percent of the \$1,000 underpayment in the first quarter). The penalty in the second quarter would be zero.

## Annualized Income Worksheet

---

You must annualize for the entire year by completing all four columns.

Complete one column at a time.

**Line 1:** This line must be the year-to-date total for each period in the appropriate column. Each column is an accumulating total and should include the amount from the previous column plus any additional income earned up to that date. The last column should equal the amount on your MI-1040, line 14. For fiduciary filers, the last column should equal the amount on your MI-1041, line 12.

**Example:** You earned \$5,000 in the first three months of the year. You earned an additional \$4,000 during April and May. Enter on Worksheet, line 1, \$5,000 in the first column and \$9,000 in the second column.

**Line 2:** Fiduciary filers, do not use the amounts shown in columns A through D. Instead, use 6, 3, 1.71429, and 1.09091, respectively, as the annualization amounts.

**Line 7:** Fiduciary filers, enter the sum of your 2022 MI-1041 credits from lines 14b, 15b, 18 and 19 in each column.

**Line 12:** Each entry on line 12 of the Annualized Worksheet will be the result of MI-2210, Part 1, line 7, divided by four, regardless of how the income is earned. If you add line 16 of the Annualized Worksheet across the columns, the sum should equal the total shown on MI-2210, line 7.

Taxpayers who annualize must also enter 25 percent of tax withheld in each column of the MI-2210, line 10, or submit documentation to substantiate uneven distribution of withholding.
